Sheila Schuller Coleman Announces the Launch of Heart of a Warrior

Movement. Delivering the children of the world for Christ

Orange, CA— September 29, 2022 — “Breaking News: Robert H. Schuller’s First Born Child, Dr. Sheila Schuller Coleman Releases New Book Telling the Story of the Loss of the Crystal Cathedral and how This Loss Led to Her Call to Launch a New International Prayer Movement: To Deliver the Children of the World for Christ.

Impact

Sheila Schuller Coleman is the firstborn child of Robert H. Schuller. In 2009 her father asked her to help him return to the leadership of the renowned Crystal Cathedral Ministries, including the local church as well as the internationally televised services. It was only a few months after she said yes to her father that the ministry was forced to declare bankruptcy. This experience, although painful, taught her spiritual lessons that she shares in a new book that serves as a launching pad for an international prayer movement. Drawing on her life’s work and professional experience in working with children (she has a Distinguished Alumnus Award from UCI school of education), she is using the book to raise awareness of the dire statistics on children globally (the current numerous threats have only become more concerning as a result of the pandemic). She is also drawing on her international connections within churches globally to call people to pray for the children of the world.

Heart of a Warrior Movement. Availability
